

SMART VOICEMAIL

Enterprise Messaging ... Only Better

Mutare's Smart Voicemail service delivers voice messages as text to email.

“ I am a huge raging fan of voice-mail-to-text services. They let you get your voice-mail messages as e-mail, as cell phone text messages... Text can be copied, pasted, forwarded, archived, searched. You can read much faster than you can listen. You can read them in any order...”

Scrolling Preview of Voicemail Messages on EVM Mobile App

The screenshot shows an Outlook email from EVM3@mutare.com to Mark Howard. The subject is 'Voice Message from 847-767-3575 (Janet Johnson)'. The attachment is '8479031286-120413-130731-69015-204-1.wav (14 KB)'. The message body contains a transcription: 'Hey Mark it's Janet. Call me on my cell as soon as you can so we can discuss that contract change before the meeting this afternoon. Bye.' Below the transcription, it says 'There are 4 new and 39 old messages in your mailbox.' To the right, a mobile app interface shows a list of voicemail messages with transcriptions, including one from Sue Jones and another from John Doe.

BENEFITS

- Affordable: A Better Solution at Half the Cost with No Capital Investment;
- Fast: Voice Transcriptions Enable Faster Response to Important Messages;
- Easy: Simple Deployment, Migration and Use.

FEATURES

- Speech to Text Powered by giSTT
- Access Voicemail on Your Mobile Device
- Simple Web Based Admin Tools
- Secure Geo Redundant Architecture

GET THE 'giSTT' OF YOUR MESSAGES

Mutare Smart Voicemail includes giSTT speech to text. giSTT is designed to deliver a reasonable approximation of the voice message. In most cases, users should be able to act on the message without needing to listen to the audio.

ABOUT MUTARE

Through unified communication technology Mutare creates customized software that makes communication easy, secure and efficient, with solutions for speech to text transcription, smart notification, secure mass notification, contact centers and more.
